

## **ABSTRACT OF THE DISCLOSURE**

**Abstract:** An Easy Horn Holder has a shoulder harness (15) that slides over the shoulder. Mounted to the shoulder harness is the adjustable angle assembly (2). A telescoping tube holder assembly (3) slides into the adjustable angle assembly (2) for height adjustment. The swivel tube (10) slides into the telescoping tube holder assembly (3) for forward or reverse location. The swivel tube (10) and telescoping tube holder assembly (3) are adjusted by using sleeve tightener with wing nut (1). The swivel tube clamp (11) holds the horn mounting plate (12) for clockwise or counter clockwise rotation of the musical instrument.
